HSE hotspot engine

Traditional Kiosk systems turn information into an available commodity.

Add our HSE to your solution and information will meet you! Literally!

We have a new formula for your success:

Information Meeting Point = Traditional Kiosk + HSE Bluetooth HotSpot

You just need your mobile phone with you. Because it is your most personal and indispensable gadget, it is also the safest place to keep your favorite contents.

Add Bluetooth technology to your Kiosk solution.
Retail, travel, transport, hospitality,... you name it!
You will get an even more powerful solution to capture your target attention!

HSE Bluetooth HotSpot avoids the burden of other distribution media (CD's, DVD's,...)

How it works

HSE Bluetooth HotSpot is a software platform embeddable in virtually any existing solution.

HSE provides information about surrounding phones.

It accepts a selected contents

It accepts a selected phone

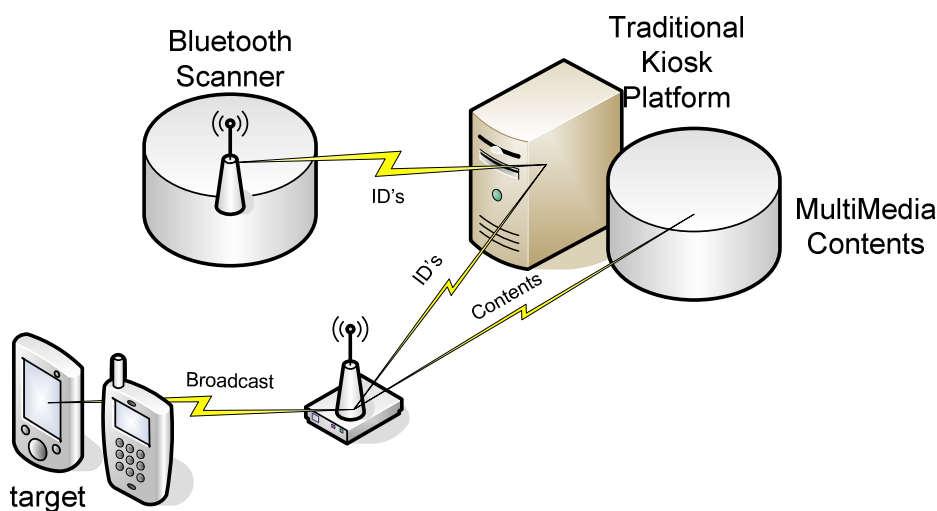

Then HSE sends the contents to the phone using Bluetooth technology.

It is a on request information source, designed to be fast and easy to use.

Use your own visual design.

HSE runs in background and accepts the orders from an external system.

There is no visual impact when using HSE.

No Worries!

HSE interfacing is really simple.

It is based on file system interaction, the most universal way of interfacing among different software packages.

No special libraries.
No software calls.
No debug effort.

Our business is software design.

If you feel this may be good as an extension of your product, call us.

We can customize our design to fit your needs.
